To do list

NOVEMBER 07, 2011

Size matters In the world of science, laws of nature vary when objects are studied on small and large scales (we're still sad about that poor little frog we dissected in biology). In the multimedia exhibit, **"Measure for Measure,"** Los Angeles-based artists explore how scale affects how we perceive the world. Pictured: Felicity Nove's 'Measurements of Space in a Fractal Structured Vacuum.' *Today from 10 a.m.-11 p.m. (through Dec. 22). Free. The Carpenter Center for the Visual Arts at Harvard University Main Gallery, 24 Quincy St., Cambridge. 617-495-3251. www.ves.fas.harvard.edu/measure.html*
